

GO ANYWHERE™

GoAnywhere™ is a centralized solution which **automates data retrieval, translation, encryption, compression and distribution** from one easy-to-use interface.

System i, Windows, Linux, Unix

Quick Facts

Open Architecture

- Installs to System i, Windows, Linux and UNIX

Dashboard Navigation

- Provides an intuitive browser-based user interface

Automated FTP

- Simplifies FTP transfers

Open PGP, SFTP, FTPS and HTTPS

- Encrypts transmissions for protecting sensitive data

Comprehensive Connectivity

- Connects to virtually any server

Data Replication

- Replicates data between database servers (DB2, SQL Server, Oracle, MySQL, etc.)

Automated E-mail

- Sends and retrieves files via email

Centralized Control

- Allows monitoring activity through the browser

Logging

- Provides detailed logging reports

Automated Data Movement for the Enterprise

GoAnywhere easily streamlines and secures the exchange of data with your customers, trading partners and servers. It allows your organization to consolidate all of its data transmission and processing needs under one solution with a single point of control and administration. With GoAnywhere, customers are saving significant time and money by eliminating the custom programming and manual steps traditionally required.

Client Testimonials

“GoAnywhere makes it easy to extract data from any Database. GoAnywhere integrates the extraction, encryption and distribution of information simply.”

– Jaime Penagos, Green Light Technology

“GoAnywhere is highly intuitive, flexible and easy to use. We use it to centralize, automate, and securely transfer files between our Intel and System i platform via SFTP (SSH). GoAnywhere is also very helpful for importing and exporting of CSV files.”

– Van N. Sy, Think Bank

“The customer service at Linoma Software has been wonderful. We were able to get an automated system up and running quickly, which can be easily adjusted for schedule changes.”

– Barbara Bularzik, Monterey Mushrooms, Inc.

Templates are included for defining data processes quickly.

Introduction

GoAnywhere will automate and secure data movement for the enterprise. With GoAnywhere’s intuitive user interface and templates, your data movement processes can be easily defined and executed by authorized personnel and applications.

GoAnywhere adopts industry-accepted standards for exchanging, formatting, encrypting and compressing data, which simplifies integration with your trading partners. This open systems solution can be installed onto IBM System i, Microsoft Windows, Linux and UNIX servers.

Server Connectivity

GoAnywhere can exchange information with a wide variety of servers and file systems. Connections are made to servers using standard protocols so no additional software needs to be installed. This non-evasive solution allows organizations to save significant administrative time and licensing fees.

Database Servers: DB2, Oracle, SQL Server, MySQL, Sybase, Informix

Transfer Protocols: FTP, FTPS, SFTP, HTTP(S), Email (SMTP), Mailbox (POP3, I-MAP), JDBC

File Systems: System i, Windows, Linux, UNIX

User Interface

GoAnywhere provides a browser-based user interface for configuring and monitoring data processes. This AJAX-enabled interface is intuitive and functional, complete with field-level help text. Popular browsers are supported, including Internet Explorer, FireFox and Safari. GoAnywhere’s templates can be used to quickly define the server connections and data processes needed.

GoAnywhere’s browser-based dashboard provides quick links to common functions as well as vital system statistics.

Data Translation

GoAnywhere reads and writes data in a variety of formats. Each format provides a variety of customizable options, which can be configured for each transfer.

Formats Supported: Excel, XML, Delimited Text (CSV), Fixed-Width Text, Database

Encryption and Compression

GoAnywhere includes standards-based encryption technology for securing sensitive data transmissions. Data can also be compressed to minimize transfer times. Depending on the requirements of your trading partner, you can choose which encryption and/or compression standard to use for each transmission.

Standards: OpenPGP, SSH, SSL, ZIP, AES, GZIP

Local Processes

GoAnywhere also allows for managing local files and executing local processes.

- Rename, move and delete files
- Call System i programs
- Create directories
- Execute native commands

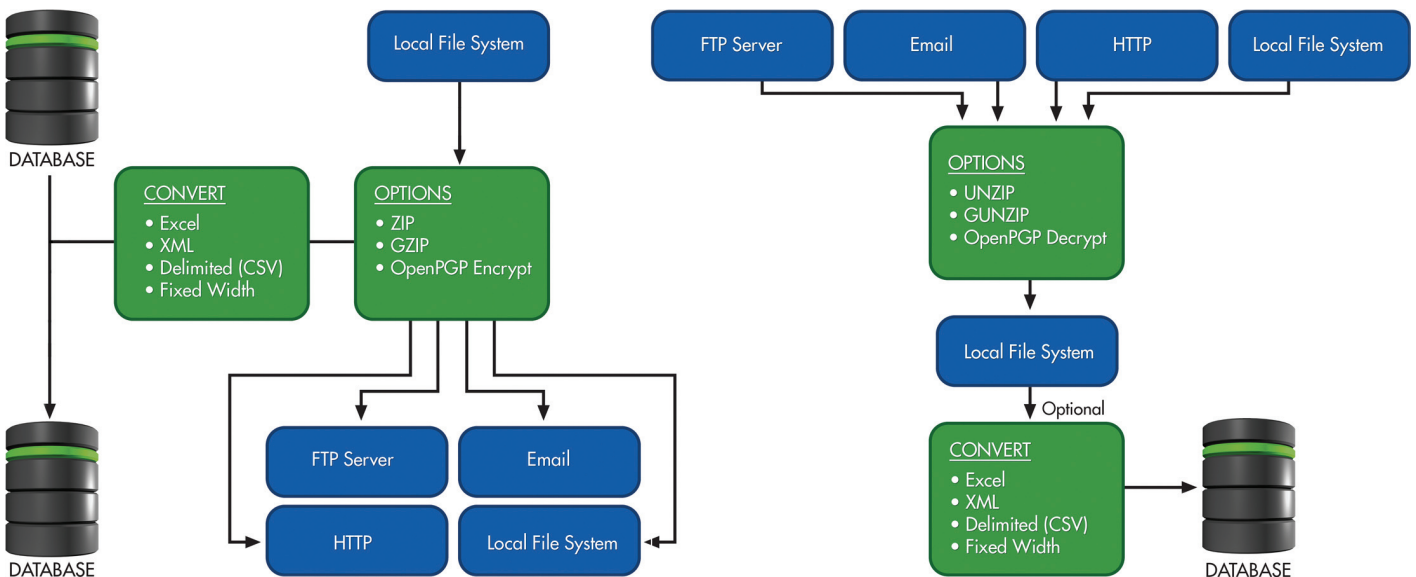

Execution and Monitoring

GoAnywhere processes can be run immediately or scheduled for the future using the built-in Scheduler or a customer's existing scheduling software. Processes can also be initiated from remote applications and systems using GoAnywhere's commands and program APIs.

GoAnywhere provides comprehensive job control and logging features to support the most demanding environments, including job queuing, multi-threading, priority settings, real-time monitoring and detailed job logs. Active and completed job logs can be viewed at any time through the browser.

Examples of What GoAnywhere Can Do

1. Replicate records (rows) between database servers.
2. Export database records into an Excel document and email it to multiple recipients.
3. Export database records into a CSV file, encrypt it with OpenPGP and send it to a FTP Server.
4. Export database records into an XML document and send it to a secure SFTP server.
5. Compress multiple documents into a ZIP file and send it to a secure FTPS server.
6. Retrieve files from a FTP server, decrypt the files and import their contents into a database.
7. Retrieve emails for a particular account, save any attachments into a file system and import their contents into a database.
8. Retrieve ZIP files from a HTTP server, unzip those files and place them onto a file system for further processing.

GoAnywhere will translate, encrypt, compress and distribute data to a variety of servers.

GoAnywhere also easily retrieves and processes files from trading partners and internal servers.

Technical Specifications

GoAnywhere for IBM System i (iSeries)

Operating System:	i5/OS V5R3 or higher
JVM:	1.5 or later
Disk Space:	75 MB
Memory:	256 MB

GoAnywhere for Microsoft Windows

Operating System:	Windows NT/2000/2003/XP/Vista
JVM:	1.5 or later
Disk Space:	125 MB
Memory:	256 MB

GoAnywhere for Linux/UNIX

Operating System:	Linux, Solaris, HP-UX, AIX
JVM:	1.5 or later
Disk Space:	125 MB
Memory:	256 MB

Server Connectivity

Database (DB2, Oracle, SQL Server, MySQL, Informix, Sybase)

Local File System

FTP

SFTP (FTP over SSH)

FTPS (FTP over SSL)

HTTP

HTTPS (HTTP over SSL)

SMTP (standard and secured)

POP3 (standard and secured)

I-MAP (standard and secured)

Encryption and Compression Standards

OpenPGP

SSH

SSL

ZIP with Standard Protection

ZIP with AES Encryption

GZIP
